

TherAssist Company Info

With over 10 years experience working with rehabilitation professionals, **TherAssist** is recognized as an industry leader in practice management and documentation solutions for the rehab industry. **TherAssist** has the expertise and a fully scalable product to provide solutions to fit individual and corporate needs across a variety of practice settings.

The **TherAssist** team includes Project Managers, Clinical Training Consultants, Technical Support Consultants and a programming staff specializing in both product development and interface capabilities. Currently, **TherAssist** utilizes physical therapists for database development and training.

TherAssist Software is presently used at over 600 rehabilitation facilities nationwide. We believe it is the best documentation and database collection utility software program of its type available. But don't take our word for it — **TherAssist** provides on-line, interactive demonstrations that provide you with a thorough view of our product and a glance at the future: remote training and maintenance of **TherAssist** products regardless of your location. Call (800) 596-3646 to set up a demo or for more information.

TherAssist Software LLC

Frequently Asked Questions

What is TherAssist?

TherAssist version 7.0 is an administrative, scheduling, documentation, and integrated billing solution for medical offices and healthcare facilities of any size. TherAssist applications are designed to maximize efficiency for both administrative and clinical staff, centralize multisite operations, and increase reimbursements. TherAssist applications are available for use in LAN, WAN and enterprise configurations or via the Internet through our ASP delivery model.

What is an ASP (Application Service Provider)?

An ASP, or Application Service Provider, is a company that provides its customers with remote access to applications hosted in a professionally managed data center. Customers can generally access these applications over the Internet or via dedicated leased lines, paying a single monthly per-user fee that covers all the costs associated with accessing, supporting, and upgrading the applications. This model allows companies to **alleviate the burden of maintaining in-house information technology resources. Instead, they can focus on their core business.**

For smaller companies that have difficulty affording the IT resources necessary to ensure success, the ASP model offers a cost-effective way of accessing the latest enterprise-level resources at a fraction of the expense and time normally required for implementation and support. As an ASP TherAssist is an affordable alternative to purchasing high-cost software solutions. With TherAssist as your ASP, you don't need to *buy and continually upgrade* hardware and software; all you **need is a web browser and a TherAssist subscription.**

What if affordable Internet access is not available?

Clients can opt to purchase TherAssist and manage it locally using a dedicated SQL server. TherAssist applications utilize a Microsoft SQL database for stability, reliability and growth. Please contact us to determine what type of configuration best suits your needs.

How do I demo TherAssist 7.0?

The demo passwords change monthly. Please contact TherAssist sales to obtain the password. All you need is Internet access and a phone line to talk on in order to run the demo. Your first demo is usually a guided tour. After that you are free to access and use the demo account anytime, anywhere, and any way you wish. Please contact TherAssist if your IT department needs instructions on opening a port for connectivity through a firewall.

Does TherAssist have billing or can it interface with my billing software?

TherAssist has its own integrated billing module. We can export demographic and billing data into your billing program and integrates with all Hospital Systems via an HL-7 interface. For Hospital Information Systems, the HL-7 interface allows for inbound ADT and outbound billing data to be exchanged. There are several written interfaces with popular billing programs and we can develop one to work with yours. Check your billing software to see if it can import data and call us to work out the details.

TherAssist Software LLC

Scheduler™

A fully integrated graphical and color-coded Scheduler. The patient registration utility has over 120 demographic fields and the ability to define over 60 custom patient based fields. Front desk personnel have instant accessibility to patient data and schedule-oriented reports. Co-pay Amounts and Patient Information appear in the Appointment Information Window when you left click in on the patient's name.

The screenshot displays the 'Health e Scheduler - (*Name)' window. It features a menu bar (File, Window, Help) and a toolbar with icons for Open, Close, New Pat, View Apps, Journal, View Notes, Ref. Books, Pat Info, Reports, Overview, Refresh, Config, and Search. The main area is a calendar for February 2007, showing a grid of appointments from 8:00 am to 3:45 pm. The grid is organized by therapist: Slope OT, Chapman, PT, Jeff Clemons PT, ATC, Jenny Peralta, and Speech Therapist. Appointments are color-coded: green for PT, yellow for ATC, red for SV, and cyan for ST. A sidebar on the left provides 'Appointment Info' for Jodie Clemons - PT Evaluation, including patient ID, insurance, and diagnosis (BRAIN INJURY).

Features:

- Up to 999 different scheduling books
- Multiple security features including "read only" settings.
- Multiple appointments with appointment conflict elimination
- Copy/Paste or drag appointments
- Search for available appointments
- Record and track copays
- Patient Journal
- Displays patient and appointment information from scheduling page
- View previous notes and appointments from patients
- Customize Appointment Colors
- Schedule recurring appointments

The screenshot shows the 'Patient Information Utility -- Visitor, Justin (1115491)' window. It has tabs for Patient Info, General Info, Insurance, Injury/Employment, Diagnosis, Precautions, and Custom Fields. The 'Patient Info' tab is active, showing fields for Patient/Billing # (1115491), Master Patient #, First Name (Justin), Middle Name, Last Name (Visitor), Address (4587 Gona Buy Way), City (Miami), State (FL), Zip (33158), Home Phone (877 669-4987), Work Phone (877 669-4987), and Alternate Phone. There are also checkboxes for 'Active Problem' and 'Exported', a Date of Birth field (1/1/1955), a Location field (W676), Room (76), and Bed (6) fields, and a Sex field (Female selected). A 'Directions' field contains the text 'updated location on 3/10'. At the bottom, there are buttons for Cancel, Save, Frequency, Back, and Next.

TherAssist Software LLC

NoteStation™

Clinicians tool--all clinical data entered in this application. Allows for clear, succinct, timely and quick documentation. Clinicians can select between various user defined clicknote menus, protocols, and objective findings - a must for multidisciplinary or specialized practice settings. Therapists have access to all past and present patient documentation and treatment received. Provides therapists with a patented table-to-text process that allows them to produce custom documentation in less than 30 seconds.

The screenshot shows the 'TherAssist NoteStation' application window. At the top, it displays the user 'Blope OT' and 'Jeff Clemons PT, ATC'. The patient information section includes: Patient Number (700000010), Patient Name (Drew Brees), Diagnosis (Impingement syndrome shoulder), Prescription Exp (2/27/2007), Next Physician Appt (2/5/2007), Next Test (2/23/2007), Authorized Visits (12), Assigned Therapist (Blope OT), Visit Start Time (10:38 AM), Visit End Time, Check In Date (Thu, Feb 8, 2007), Date Of Onset (Sun, Oct 8, 2006), Freq. Duration (3 x W / 4 W), CoPayment (\$10.00), Effective Date (02/08/2007), and Total Billed (\$65.00). A 'More Patient Info...' button is located at the bottom right of this section. Below the patient information is a toolbar with icons for Quit, Login/Logout, Refresh, Utilities, Close File, Patient Work, and Patient Note.

The screenshot shows the 'Note for Drew Brees - [ACRA Local 725] visit on Thu, Feb 8, 2007 - Visit 2' window. The interface includes tabs for Subjective, Objective, Obj Findings, Assessment, Plan, Goals, Custom Fields, and Billing. On the left, there is a 'ClickNotes' list with categories like 'Eval General - **OPENING**', 'Eval General - **CONCLUSION**', 'Eval MOI - **OPENING**', and 'Eval Function - **CONCLUSION**'. The main area is titled 'Note' and contains the following text: 'Patient presents to therapy for evaluation and treatment of shoulder pain, at this time. The patient's mechanism of injury was secondary to a work related injury. Patient reports decreased functional ability to perform the following: grip & hold items, lift/carry, perform overhead activities, raise involved upper extremity, perform work activities, at the time of this evaluation. Patient reports decreased functional ability to perform the following: hitting or striking balls, throwing underhand or overhand, carrying loads at work, lifting activities at work, pushing objects at work, reaching for objects at work, and no other complaints at this time. Diagnostic testing revealed torn labrum right shoulder. Patient reports pain rated 6 on a 10-point scale.' Below the note is a 'Length 772 Max: 4000' indicator and a toolbar with icons for QuickFill, Note Viewer, Oops!, Back, and Next.

Features:

- HIPAA compliant "Login & Logout" with password protection
- Complete access to all pt info
- Spell Check Entire Note
- Customizable treatment protocols
- Customizable objective findings groups for evaluations
- User defined click notes sorted by discipline
- Access to all past documentation and treatments
- Billing charges displayed are Insurance or diagnosis specific
- Calculate visit duration from treatment plan
- Automatic recording of visit start and end times and duration
- Electronic signature
- Immediately view and print Initial Eval, Progress letter, Plan of Care and Billing Notes

TherAssist Software LLC

AutoDocs™

The TherAssist data-mining application that allows collected data to be utilized in customized applications integrated with MS Office97™ or MS Office2000™. **AutoDocs™** retrieves and reports collected data (from NoteStation & Scheduler) and generates customized batch Word™ documents (i.e.- Initial Evaluations, Re-Certifications, Summaries, 700/701s, Physician Letters, etc.).

AutoDocs 6.0.4

3. Create Form Close

Features:

- User friendly, utilizes Microsoft Word
- Access to all database fields
- Create any note on any template at anytime
- User defined templates created in MS Word
- Immediate access to closed notes for creating reports, letters etc
- Email, fax created documents
- Create documents in batches by date range, 1st visit, final visit
- Create documents in batches by referral source, diagnosis or insurance
- Create documents from any site
- Create documents for discharged patients

TherAssist Software LLC

NoteServer™

Administrator's utility-- tools for complete modification of database. Also provides the Administrator immediate status update of day's patient population (i.e.- prescription expiration, check in time, completion of documentation, etc.) by site. Exports patient and billing data to billing applications and allows for the retrieval of any patient note.
